Duvvur Sai Krishna

Senior Azure FinOps Engineer — Cloud Infrastructure & Cost Governance

5 years building Azure environments. 6+ years optimising them. That builder-to-optimizer arc means I understand exactly where cloud waste hides.

PROFESSIONAL SUMMARY

Azure FinOps engineer with **12+ years** in cloud infrastructure and financial governance — 5 years building Azure environments, 6+ years optimising them. Delivered **£624K annualised savings** for a UK water utility through architecture redesign and FinOps practice implementation. Built **showback/chargeback frameworks** and custom **Power BI cost analytics** for a European insurer governing **3,000+ Azure resources** across multi-subscription environments. Deep understanding of **Azure commercial constructs** (EA/MCA/CSP licensing) gained through Microsoft-side consulting. Specialist in **FinOps lifecycle execution**: Inform → Optimize → Operate.

KEY ACHIEVEMENTS

£624K/yr

COST SAVINGS DELIVERED

Redesigned Azure architecture and governance for a UK water services organisation, achieving £52K/month sustained savings through policy optimisation, rightsizing, and chargeback implementation.

3,000+

RESOURCES GOVERNED

Led day-to-day FinOps operations across multiple international clients — European insurance, UK utilities — managing Azure Policy, RBAC, and Management Groups at scale.

CEO

MICROSOFT RECOGNITION

Contributed to an application recognised by Microsoft CEO Satya Nadella during public keynotes — demonstrating production-grade solution delivery at platform-vendor quality.

FINOPS APPROACH

Inform

Cost visibility via Power BI dashboards, Azure Cost Management APIs, tagging governance, allocation & showback/chargeback models

Optimize

Rightsizing, RI/Savings Plans coverage, policy enforcement, anomaly detection, architecture redesign for cost efficiency

Operate

Budgeting, forecasting, stakeholder reporting cadence, continuous governance via Azure Policy, GreenOps & sustainability metrics

CORE COMPETENCIES

FINOPS & GOVERNANCE

- **Azure Cost Management** & Billing
- **Budgeting, Forecasting** & Anomaly Detection
- **Reserved Instances** & Azure Savings Plans
- **Showback / Chargeback** / Allocation
- **Tagging Governance** & Azure Policy
- **Unit Economics** & Cost per Workload
- **FinOps Lifecycle** (Inform → Optimize → Operate)
- **EA / MCA / CSP** Licensing Constructs
- **GreenOps** & Carbon Optimization

AZURE INFRASTRUCTURE

- **IaaS & PaaS** Administration
- **Azure SQL** (Single, Elastic Pools, Geo-Rep)
- VMs, Storage, Networking, Backups
- **Azure Policy, RBAC** , Management Groups
- **AKS** Cost Allocation & Container FinOps
- High Availability & DR Architecture
- Cloud Migration & Modernization
- Azure DevOps & CI/CD Pipelines

ANALYTICS & AUTOMATION

- **Power BI** Cost Dashboards & Reporting
- **Azure Cost APIs** & KQL (Kusto Query)
- **ARM Templates, Bicep** & Terraform (IaC)
- **PowerShell** & Python Scripting
- Azure Data Factory & MySQL
- PowerApps & Power Automate
- Microsoft Dynamics CRM & SharePoint
- On-Premises to Cloud Data Migration

PROFESSIONAL EXPERIENCE

Infosys Limited

Senior FinOps Engineer & Cloud Consultant

July 2018 – Present

India / Client-site Europe

European Insurance Client — Cloud Financial Governance

FINOPS PRACTICE BUILD

- ▶ Governed Azure cloud spend for a **European insurance organisation**, establishing FinOps practices across multi-subscription environments with significant annual cloud spend under management
- ▶ Designed and deployed custom **Power BI dashboards** consuming **Azure Cost Management APIs**, delivering real-time cost visibility, anomaly detection, and trend analysis to engineering, finance, and leadership stakeholders
- ▶ Implemented **showback/chargeback models** with allocation based on tagging, labels, and custom dimensions — achieving full spend transparency and accountability across business units
- ▶ Established **budgeting, forecasting, and alerting frameworks** with monthly forecast cycles, enabling proactive cost control and early anomaly detection
- ▶ Executed **rightsizing initiatives** across compute, storage, backup, and networking — reducing waste through utilization analysis and resource optimisation recommendations
- ▶ Managed **Reserved Instance portfolio** and **Azure Savings Plans**, maintaining high coverage and utilization rates through continuous commitment optimisation
- ▶ Enforced **tagging compliance via Azure Policy**, improving resource attribution from baseline to high compliance across all subscriptions

UK Water Services Client — Cloud Cost Transformation

£624K/YR SAVINGS

- ▶ Redesigned Azure architecture and governance policies, optimising cloud footprint to deliver **£52K/month (£624K annualised)** in cost savings
- ▶ Implemented **chargeback mechanisms** attributing costs to individual projects, driving cost accountability across engineering teams
- ▶ Conducted **cloud infrastructure assessment**, identifying and eliminating over-provisioned, idle, and orphaned resources through policy optimisation and resource rightsizing
- ▶ Aligned solution design with **cost-efficient architecture patterns**, ensuring new workloads were provisioned with optimal pricing models from inception

Cross-Client FinOps Operations

3,000+ RESOURCES

- ▶ Led day-to-day cloud operations across multiple international clients, governing **3,000+ Azure infrastructure resources**
- ▶ Managed **Azure Policy, RBAC, and Management Groups** ensuring governance compliance across multi-subscription environments
- ▶ Supported **cloud migration projects**, designing cost-efficient target architectures and recommending optimal pricing models for migrated workloads
- ▶ Partnered with engineering, finance, and leadership teams to align cloud investment with business objectives through regular cost review cadences

PALS Global Solutions / Microsoft India

Cloud Infrastructure Consultant & Azure Technical Specialist

March 2013 – July 2018

India

Microsoft India — External Cloud Technical Consultant

2016–2019

- ▶ Seconded to **Microsoft India** as external consultant through PALS partnership, demonstrating Azure capabilities and guiding SME customers through cloud adoption
- ▶ Developed **deep understanding of Azure pricing models, EA/MCA licensing, and commercial constructs** from the vendor side — insight that now informs every cost optimisation decision
- ▶ Presented interactive **Power BI dashboards for cost visibility**, enabling customers to visualise and plan cloud investments before migration
- ▶ Advised customers on **budgeting strategies, right-sizing resource selection, and commitment model options** to prevent over-provisioning from day one
- ▶ Enabled **Azure DevOps practices and PaaS adoption**, helping customers reduce infrastructure costs through modern service models

PALS Global Solutions — Cloud Infrastructure & Data Engineering

- ▶ Provisioned and managed Azure IaaS/PaaS environments, designing **high availability and DR architectures** with Availability Zones and redundancy strategies
- ▶ Designed and administered **Azure SQL PaaS** (Single Database, Elastic Pools, Geo-Replication) with **automated scale-up/scale-down** scripting for optimal resource utilization and cost efficiency
- ▶ Led **on-premises to Azure SQL migrations** with performance, security, and cost optimisation — building database cost expertise that later informed FinOps governance
- ▶ Built **end-to-end Power BI dashboards** for global clients and Government of India organisations
- ▶ Developed and deployed **Azure AI services** with predictive models for agriculture and healthcare domains
- ▶ Contributed to an application **recognised by Microsoft CEO Satya Nadella** during public keynotes

PROFESSIONAL REFERENCES

"Sai Krishna transformed how we understand our Azure spend. The dashboards he built gave us visibility we never had before, and the chargeback model he implemented drove real accountability across teams.

**Available on request**

Engagement Manager, Infosys — European Insurance Client

"His ability to redesign our Azure architecture while simultaneously building the governance framework was exactly what we needed. The £52K/month savings spoke for themselves.

**Available on request**

Technical Lead, UK Water Services Client
